- **Backend:** Java, Kotlin, Spring Boot
- **Frontend:** React, HTML5, CSS3, JavaScript (ES6+), Bootstrap, TailwindCSS
- **Mobile:** Kotlin Android (Jetpack Compose)
- **Databases:** Oracle, MySQL, PostgreSQL, PL/SQL, Firebase, Firebase Realtime Database, MongoDB, SQLite
- **DevOps:** Docker, UNIX/Linux (Red Hat, Debian, Ubuntu), Postman, SoapUI
- **Data Analysis:** Elasticsearch, Logstash, Kibana (ELK Stack)
- **Version Control:** Git

PROFESSIONAL EXPERIENCE

Panel Sistemas Informáticos

Madrid, Spain

Backend Development Intern

March 2025–June 2025

- Participation in the AltamirA project (Telefónica/Ericsson), a real-time charging platform, developing backend on legacy systems with Java, integrating functionalities, and automating API tests (SOAP) using SoapUI.
- Data analysis and monitoring with *Elasticsearch*, *Kibana* and *Logstash* to optimize performance and detect incidents.
- Work in *Red Hat Linux* environments, verification of packages with *Goss* and participation in CI/CD and quality control.

PROFESSIONAL PROJECTS

Talleres GR

Madrid, Spain

Web Development

March 2025–April 2025

- Implementation of an optimized static page, reducing customer-workshop contact time by 30%. Frontend built with HTML, CSS, JavaScript and animations with ScrollReveal.
- Email sending system integrated with EmailJS, improving direct communication from the web.
- Clean, responsive and mobile-first design, increasing the user interaction rate.
